- (S4) Title: POTATOES WITH INCREASED PROTEIN CONTENT

[illegible]

- (57) **Abstract:** The invention relates to the breeding and selection of potatoes. The invention provides a potato plant or part derived thereof having at least one *amf*-allele said potato plant or part further provided with an increased capacity to store a protein as characterized by an increased protein content of its tubers. Furthermore, the invention provides a method for breeding and selecting a potato with an increased capacity to store a protein comprising crossing a first parent potato with at least one *amf*-allele with a second parent potato without an *amf*-allele, and selecting progeny for the presence of at least one *amf*-allele with a protein content of its tubers higher than detected in said first parent or said second parent.
